HIGHLIGHTS OF QUALIFICATIONS

- Experienced building full-stack solutions, from backend services through to the frontend interfaces that consume them.
- Backend-focused on designing and maintaining RESTful and GraphQL endpoints to expose business logic to internal and third-party consumers.
- Applies DevOps practices — CI/CD pipeline automation, containerization, and orchestration — in real production environments; Microsoft Certified in Azure Fundamentals.
- Strong communicator and troubleshooter, with a track record of improving system reliability and cross-team collaboration.

PROFESSIONAL EXPERIENCE

Procor Limited

Platform Engineer (Part-time)

DevOps Engineer (Co-op)

DevOps Engineer (Co-op)

Oakville, Ontario

Sep 2026 – Present

May 2026 – Aug 2026

May 2025 – Dec 2025

- Automated deployment of software updates and configuration changes to reduce manual errors and release time.
- Configured and deployed containerized application instances on Kubernetes, including local and cloud environments.
- Built and enhanced Jenkins CI/CD pipelines to support and streamline the development team's release process.
- Installed and configured new containerized software packages using Docker.
- Monitored production systems and troubleshoot issues as they arose to maintain uptime and reliability.
- Collaborated with development teams to improve pipelines, tooling, and cross-team workflows.
- Documented maintenance procedures and system requirements for ongoing operations.

Peer Tutor

Mohawk College Learning Support Centre

Hamilton, Ontario

May 2024 – Dec 2024

- Ran weekly open lab sessions for 5+ students, planning guided learning activities in Java and Python.
- Communicated clearly with students, faculty, and team leads to support academic goals in a positive environment.

Magento Backend Developer

Wolfsellers – Adobe Gold Partner

Mexico City, Mexico

Sep 2021 – May 2023

- Designed and developed custom Magento/Adobe Commerce backend modules to extend core e-commerce functionality.
- Built GraphQL endpoints to expose backend business logic to internal systems and third-party consumers.
- Integrated third-party APIs to automate and streamline business operations.
- Collaborated with frontend developers to ensure smooth integration between backend services and the storefront.
